ROYPOW Solution

- ✓ Compact, integrated design for easy installation and transportation
- ✓ Easy parallel connection for specific project needs
- ✓ Connect to DG and solar panels
- ✓ Built tough to withstand harsh working conditions
- ✓ Intelligent management

Diesel Generator Solution

- High fuel consumption and costs
- Remote monitoring not allowed for most DGs
- Frequent maintenance and oil changes required
- Air pollution and excessive noise

Standard C&I Energy Solution

- Bulky size and heavy weight. Difficult to carry Suitable for use in fixed locations
- Cannot be moved frequently
- Poor vibration resistance
- High initial purchase cost
- Require professional personnel for operation

Portable Power Solution

- Small battery capacity & short battery life
- Low power, not suitable for mechanical equipment
- Not support 3-phase 380V output, generator charging, or remote monitoring
- Poor overload capacity
- Interface not waterproof

Eliminate the Need for A Higher-Power DG

Starting a 7kW electric motor—an inductive load requiring 3 to 5 times its rated power for startup—is beyond the capacity of a 10kW DG. ROYPOW system delivers up to 30kW of power output for 10 seconds, effortlessly handling demanding loads, eliminating the need for a higher-power DG, and reducing fuel consumption and associated costs.

Generator Connection with Automatic Charging

When undercharged, the system automatically start the diesel generator for charging and shuts it down once fully charged.

Rugged and Reliable

Designed with robust internal reinforcements for the inverter and batteries, the system ensures greater vibration resistance and reliability, effectively minimizing risks of instability or damage during frequent transportation.
